

PRD / Agent Injection Prompt

Magnifica Humanitas — Heraldic Materiality & Ceremonial Polish Pass

Role

You are Claude 4.8 acting as a senior front-end implementation agent, design-systems engineer, and visual craft specialist.

You are working on the live site:

`https://augustave.github.io/magnifica/`

The site is an encyclical-style web artifact titled **Magnifica Humanitas — On Safeguarding the Human Person in the Time of Artificial Intelligence**.

Your task is not to redesign the site architecture. The Hybrid information architecture has already landed and must be preserved.

Your task is to perform a **Heraldic Materiality & Ceremonial Polish Pass** so the site feels more like a crafted ecclesial / heraldic document and less like a web page with flat decorative elements.

1. Current State

The site now has the correct structure:

1. Cover / Hero
2. Incipit
3. Summa / Argument in Brief
4. Three Ways to Read
5. Reader Paths
6. Index Rerum / Contents
7. Five Principles for the Digital Age
8. Doctrine Map
9. Introduction
10. Chapter I
11. Chapter II
12. Chapter III
13. Chapter IV
14. Chapter V

15. Apply the Doctrine
 - Governance Gates
 - Five Red Lines
 - Person Test
 - Export the Doctrine
16. Conclusion
17. Footer

This structure is correct. Do not restructure it.

2. Main Problem

The site architecture is now strong, but the visual materiality is underpowered.

The current issues:

- Gold decoration does not read as real gold, foil, embroidery, or metal.
 - Decorative elements feel weak and flat.
 - Reader Path cards and operational cards lose themselves against the parchment background.
 - A normal web drop shadow would be wrong; the cards should feel physically attached like stamps, stickers, bookplates, or archival labels.
 - The cross / wreath emblem in the blue area is too soft and does not feel like a real heraldic insignia.
 - Opening paragraph letters / drop caps need to feel more ceremonial, like illuminated manuscript initials.
 - Buttons still feel too close to default web controls.
 - The “Five Red Lines” section should feel more judicial and doctrinal.
 - The “Person Test” needs the English title visible alongside the Latin title.
 - Decorative arrows / glyphs inside Governance Gates should not be confusing for screen readers.
-

3. Design Reference

Use the provided **Cape Art Direction System** as the main inspiration.

Extract these principles from the reference:

- Ceremonial heraldic visual language
- Royal blue ground
- Antique gold ornament
- Crimson ceremonial accent
- Ivory paper substrate
- Stone grey restraint
- Laurel wreaths
- Crossed forms

- Heraldic shields / crests
- Chain / medallion logic
- Ornamental embroidery
- Symmetry and order
- Sacred framing
- Hierarchy and clarity
- Gold on blue
- Restrained ornament
- Materials: matte wool, gold embroidery, braided cord, polished metal, satin lining, parchment paper

The site should feel like:

A papal encyclical rendered as a ceremonial archival object: paper, foil, ink, seal, vellum, embroidery, bookplate, and institutional insignia.

It should not feel like:

- SaaS dashboard
- Startup landing page
- Generic Bootstrap card layout
- Flat AI ethics website
- Neon AI interface
- Glassmorphism
- Overly modern product UI

4. Design Target

The final site should feel like:

A cathedral console for judging machines.

More specifically:

- The encyclical text should feel sacred and authoritative.
 - The operational sections should feel like attached doctrine instruments.
 - Cards should feel mounted onto parchment, not floating above it.
 - Gold should feel like antique foil / embroidery / stamped metal.
 - Cross and wreath motifs should feel heraldic and ranked.
 - Drop caps should feel like ceremonial manuscript openings.
 - Buttons should feel like archival control labels, not web buttons.
-

5. Hard Constraints

Do not:

- Change the page structure.
- Remove existing encyclical content.
- Rewrite the doctrine.
- Add a new major UX concept.
- Use regular heavy drop shadows.
- Make the site look like SaaS.
- Make the gold bright yellow or plastic.
- Overdecorate every section.
- Add animation unless very subtle and respectful.
- Break mobile.
- Break the current anchor navigation.
- Remove the sidebar.
- Remove the dropdown.
- Reduce readability.

Do:

- Preserve the current Hybrid architecture.
 - Preserve the blue / ivory / gold / crimson identity.
 - Preserve the ecclesial tone.
 - Add physical materiality.
 - Improve legibility and contrast.
 - Use reusable CSS tokens and classes.
 - Improve accessibility.
 - Test responsive behavior.
-

6. Implementation Plan

Before editing, inspect the codebase.

Identify:

- Main HTML file
- Main CSS file
- JavaScript file, if any
- SVG / image assets
- Current class names for:
 - reader path cards
 - reading mode cards
 - principle cards

- doctrine map
- governance gates
- export cards
- quote buttons
- hero emblem
- drop caps / first paragraphs
- sidebar / dropdown

Then make a short implementation plan before writing code.

Proceed in small, reversible changes.

7. Feature 1 — Antique Gold Material System

Problem

Gold currently reads too flat, beige, and low-authority.

Goal

Create a richer antique gold material treatment that can be reused across decoration, type, borders, rules, and emblems.

Add or refine CSS tokens

Use tokens similar to:

```
:root {  
  --gold-deep: #7f5a1c;  
  --gold-core: #c8a24a;  
  --gold-light: #f3df9a;  
  --gold-shadow: #4d3510;  
  --gold-muted: #a88438;  
  --gold-red-shadow: #6b2e1d;  
  
  --crimson: #9f1d25;  
  --crimson-dark: #681219;  
  
  --royal-blue: #173e6e;  
  --midnight-navy: #081222;  
  --ivory: #f2efe3;  
  --paper-warm: #eee7d6;  
  --paper-card: #f8f1df;
```

```
--stone-grey: #a6a29a;  
}
```

Adapt names to existing code style if tokens already exist.

Create gold utility classes

Add a reusable gold foil / embroidered treatment.

Example:

```
.gold-foil {  
  background:  
    linear-gradient(  
      115deg,  
      var(--gold-shadow) 0%,  
      var(--gold-core) 24%,  
      var(--gold-light) 42%,  
      var(--gold-core) 58%,  
      var(--gold-deep) 100%  
    );  
  -webkit-background-clip: text;  
  background-clip: text;  
  color: transparent;  
  text-shadow:  
    0 0.5px 0 rgba(255, 244, 190, 0.45),  
    0 1px 1px rgba(48, 31, 9, 0.28);  
}
```

Add a border/rule treatment:

```
.gold-rule {  
  border-color: rgba(200, 162, 74, 0.68);  
  box-shadow:  
    inset 0 1px 0 rgba(255, 244, 190, 0.35),  
    0 0 0 1px rgba(92, 66, 22, 0.18);  
}
```

Apply to

- Decorative rules
- Section flourishes
- Alpha / Omega marks
- Sidebar ornament

- Reader Path card accents
- Principle card numerals
- Doctrine Map headings
- Governance Gate numerals
- Red Line numerals
- Export card titles
- Hero insignia highlights

Acceptance Criteria

- Gold reads as antique gold, not beige.
 - Gold has highlight and lowlight.
 - It remains restrained.
 - It does not look plastic or bright yellow.
 - Existing typography remains readable.
-

8. Feature 2 — Attached Stamp / Sticker Card System

Problem

Cards are losing themselves against the parchment background.

A normal drop shadow is not acceptable because it makes the page feel like a modern UI kit.

Goal

Cards should feel like physical objects attached to the paper:

- archival labels
- pasted paper slips
- vellum stickers
- bookplates
- ceremonial stamps
- museum catalog mounts

Required visual features

Each operational card should have:

1. Slight paper-tone difference from the background.
2. Thin gold or blue border.
3. Inner hairline rule.

4. Subtle paper grain.
5. Micro edge / pressed outline.
6. Tiny attachment cue such as a corner tab, registration mark, or seal dot.
7. No heavy drop shadow.

Suggested CSS direction

Create a reusable class:

```
.archival-card {  
  position: relative;  
  background:  
    linear-gradient(  
      180deg,  
      rgba(255, 252, 241, 0.94),  
      rgba(244, 237, 218, 0.9)  
    );  
  border: 1px solid rgba(159, 126, 55, 0.46);  
  outline: 1px solid rgba(255, 255, 255, 0.45);  
  box-shadow:  
    inset 0 0 0 1px rgba(255, 248, 218, 0.65),  
    inset 0 -1px 0 rgba(128, 96, 42, 0.16),  
    0 1px 0 rgba(85, 63, 30, 0.1);  
}
```

Inner rule:

```
.archival-card::before {  
  content: "";  
  position: absolute;  
  inset: 6px;  
  pointer-events: none;  
  border: 1px solid rgba(159, 126, 55, 0.22);  
}
```

Optional corner attachment:

```
.archival-card::after {  
  content: "";  
  position: absolute;  
  top: -8px;  
  right: 22px;  
  width: 42px;  
  height: 15px;
```

```
background: rgba(222, 207, 166, 0.58);
border: 1px solid rgba(159, 126, 55, 0.25);
transform: rotate(1.5deg);
pointer-events: none;
}
```

If the corner tab feels too cute, use a small seal mark instead.

Seal option:

```
.card-seal {
width: 18px;
height: 18px;
border-radius: 50%;
background:
  radial-gradient(circle at 35% 30%, #f3df9a, #c8a24a 45%, #7c571b 100%);
box-shadow:
  inset 0 1px 0 rgba(255,255,255,.35),
  0 1px 0 rgba(80, 50, 18, .18);
}
```

Use either tabs or seal dots. Do not use both everywhere.

Apply to

- Reading Mode cards
- Reader Path cards
- Five Principle cards
- Doctrine Map columns
- Governance Gate cards
- Export cards

Acceptance Criteria

- Cards are clearly separated from the paper background.
 - Cards feel attached or mounted, not floating.
 - No generic web-card shadow.
 - Mobile cards remain clean.
 - The operational layer feels native to the document.
-

9. Feature 3 — Reader Path Card Contrast Fix

Problem

Reader Path cards currently blur into the paper background.

Goal

Make each Reader Path card feel like a mounted invitation card / archival label.

Requirements

- Apply `archival-card` or equivalent treatment.
- Increase border contrast slightly.
- Increase internal padding if needed.
- Preserve large italic question typography.
- Make target links more legible.
- Add a small gold or blue corner marker.
- Avoid heavy shadow.

Specific styling direction

Reader Path card labels like “For Builders” should remain small caps in blue.

The question should remain elegant and italic.

The lower link, e.g. “→ Governance Gates,” should look like a ceremonial routing mark, not a generic link.

Acceptance Criteria

- Cards remain visible even at low screen brightness.
- Card edges are clear.
- The cards feel like placed objects on paper.
- Layout still works as 3-column / 2-column / 1-column responsive grid.

10. Feature 4 — Heraldic Cross / Wreath Emblem Upgrade

Problem

The large cross / wreath emblem in the blue area reads too weak and watermark-like.

Goal

Make the emblem feel like a real institutional heraldic insignia.

It should feel like:

- stamped crest
- gold embroidery on blue
- ceremonial medallion
- papal / institutional seal
- heraldic badge

Design Direction

Use the Cape system motifs:

- laurel wreath
- central cross
- shield or quatrefoil field
- gold-on-blue contrast
- symmetry
- rank
- formal balance

Implementation Options

Option A — Improve current SVG / emblem

If the current cross / wreath exists as SVG or CSS:

- Increase contrast.
- Add antique gold tone.
- Add subtle highlight and lowlight.
- Make cross more legible.
- Reduce excessive transparency.
- Add slight pressed / embroidered relief.
- Keep it behind title, but strong enough to read.

Example CSS:

```
.hero-emblem {  
  opacity: 0.32;  
  color: var(--gold-core);  
  filter:  
    drop-shadow(0 1px 0 rgba(255, 234, 170, 0.24))
```

```
    drop-shadow(0 -1px 0 rgba(10, 18, 32, 0.36));  
  }
```

Option B — Add crest medallion

If the large watermark remains difficult, create a smaller crest medallion near the title or chapter headers:

- circular or oval laurel ring
- central cross
- antique gold effect
- optional crimson center field
- blue ground

This can coexist with a lighter large watermark.

Important

Do not use clip-art-looking ornament.

If editing SVG, keep it simple, symmetrical, and constructed.

Acceptance Criteria

- Cross is legible.
- Wreath feels ceremonial.
- Emblem has material presence.
- Emblem does not overpower the title.
- It feels connected to the Cape Art Direction System.

11. Feature 5 — Ceremonial Drop Caps / Illuminated Initials

Problem

The initial letter at the beginning of main text currently feels typographic but not ceremonial enough.

Goal

Opening paragraph initials should feel like illuminated manuscript capitals.

They should suggest:

- papal document
- ecclesial proclamation
- red ink
- gold support
- parchment
- manuscript entry marker

Apply to

Use on:

- Incipit opening if appropriate
- Introduction first paragraph
- Chapter I first body paragraph
- Chapter II first body paragraph
- Chapter III first body paragraph
- Chapter IV first body paragraph
- Chapter V first body paragraph
- Conclusion first body paragraph

Do not apply to every paragraph.

CSS Direction

If using `::first-letter`:

```
.chapter-body > p:first-of-type::first-letter,  
.section-body > p:first-of-type::first-letter {  
  float: left;  
  font-family: "Cormorant Garamond", "Trajan Pro", serif;  
  font-size: 5.8rem;  
  line-height: 0.82;  
  padding: 0.12em 0.16em 0.04em 0;  
  margin-right: 0.08em;  
  color: var(--crimson);  
  text-shadow:  
    0.5px 0.5px 0 var(--gold-core),  
    1px 1px 0 rgba(92, 66, 22, 0.32);  
}
```

If manual span is possible:

```
<span class="illuminated-cap">A</span>
```

```
.illuminated-cap {  
  float: left;  
  display: inline-grid;  
  place-items: center;  
  width: 1.05em;  
  height: 1.05em;  
  margin: 0.02em 0.16em 0 0;  
  font-family: "Trajan Pro", "Cormorant Garamond", serif;  
  font-size: 5.4rem;  
  line-height: 1;  
  color: var(--crimson);  
  background:  
    linear-gradient(180deg, rgba(255,248,224,.78), rgba(236,222,184,.58));  
  border: 1px solid rgba(200,162,74,.58);  
  box-shadow:  
    inset 0 0 0 2px rgba(255,255,255,.35),  
    inset 0 0 0 4px rgba(200,162,74,.16);  
}
```

Mobile

On small screens:

- Reduce size.
- Avoid breaking line height.
- Ensure text wraps cleanly.

Acceptance Criteria

- Drop caps look intentional and ceremonial.
 - Red has gold support.
 - Mobile layout remains readable.
 - They are not overused.
-

12. Feature 6 — Button / Copy Control Material Upgrade

Problem

Copy buttons currently look too close to default browser buttons.

Goal

Buttons should feel like small archival control labels.

They should suggest:

- stamped paper tabs
- catalog marks
- document controls
- ceremonial utility labels

Apply to

- Copy quote
- Copy governance rule
- Copy link
- Copy SKILL.md
- Copy principles.yaml
- Copy audit_gates.yaml
- Copy agent_prompt.md

CSS Direction

```
.copy-button,  
.quote-action,  
.export-action {  
  appearance: none;  
  border: 1px solid rgba(159, 126, 55, 0.52);  
  background: rgba(246, 238, 214, 0.76);  
  color: var(--royal-blue);  
  font-family: var(--font-smallcaps, inherit);  
  font-size: 0.72rem;  
  letter-spacing: 0.12em;  
  text-transform: uppercase;  
  padding: 0.55rem 0.7rem;  
  box-shadow:  
    inset 0 1px 0 rgba(255, 255, 255, 0.55),
```

```
    0 1px 0 rgba(88, 66, 30, 0.12);  
    cursor: pointer;  
}
```

Hover:

```
.copy-button:hover,  
.quote-action:hover,  
.export-action:hover {  
    background: rgba(255, 247, 220, 0.94);  
    border-color: rgba(200, 162, 74, 0.74);  
}
```

Focus:

```
.copy-button:focus-visible,  
.quote-action:focus-visible,  
.export-action:focus-visible {  
    outline: 2px solid var(--gold-light);  
    outline-offset: 3px;  
}
```

Copy Feedback

All copy buttons should show a small “Copied” state for approximately 2 seconds.

Acceptance Criteria

- Buttons no longer look default.
- Buttons remain keyboard accessible.
- Focus state is visible.
- Copied feedback works.
- Buttons feel native to the archival document.

13. Feature 7 — Five Red Lines: Roman Numbering & Judicial Weight

Problem

The Five Red Lines are conceptually strong but visually too plain.

Goal

Make them feel like solemn doctrinal prohibitions.

Required display

Show them as Roman-numbered lines:

- I. No human being may be reduced to a score of worth.
- II. No high-stakes decision may hide responsibility behind a model.
- III. No private platform may quietly govern public truth without scrutiny.
- IV. No automation may sacrifice workers without protection and retraining.
- V. No machine may simulate moral agency where conscience is required.

Styling Direction

- Use Roman numerals in antique gold.
- Use larger type than normal body copy.
- Add strong spacing.
- Optional thin gold divider between lines.
- Do not use loud warning red blocks.
- The mood should be judicial, not alarmist.

Acceptance Criteria

- Red Lines are more memorable.
- They read as doctrine.
- Roman numerals are visible.
- Mobile remains readable.

14. Feature 8 — Person Test Title Fix

Problem

Current section shows:

Probatio Personae

Then immediately the subtitle.

It needs the English title too.

Required Change

Display:

Probatio Personae

The Person Test

Before every system, ask who becomes more human – and who becomes easier to discard.

Acceptance Criteria

- English title is visible.
 - Latin title remains.
 - Section is easier to understand.
 - No layout disruption.
-

15. Feature 9 — Governance Gate Arrow Accessibility

Problem

Governance Gates contain a decorative  between the question and Pass/Fail fields.

This may be fine visually, but it should not be read as meaningful text by assistive technology if decorative.

Required Change

If the arrow is decorative, render it as:

```
<span aria-hidden="true">></span>
```

or replace it with a CSS divider.

Acceptance Criteria

- Screen readers are not forced to read decorative arrows.
- Visual divider remains if useful.
- No visual regression.

16. Feature 10 — Dropdown Label Polish

Problem

Dropdown currently says “Executive Summary,” which is clear but too corporate for the site’s voice.

Required Change

Change dropdown option label from:

Executive Summary

to:

Summa

or:

Summa · Argument in Brief

Preferred:

Summa

Acceptance Criteria

- Dropdown remains clear.
- Voice becomes more consistent.
- Anchor remains `#executive-summary`.

17. Feature 11 — Bridge Sentence Before Principles

Goal

Add a short bridge explaining why the operational doctrine section exists.

Placement

Before “Five Principles for the Digital Age.”

Required Copy

"The following principles are not a replacement for the encyclical. They are its working apparatus: the doctrine translated into questions, gates, and tests."

Styling

Use quiet small-caps or italic editorial style.

Should feel like marginalia / editorial apparatus.

Acceptance Criteria

- Bridge appears before Principles.
 - It does not feel like marketing copy.
 - It clarifies the relationship between the long text and operational sections.
-

18. Feature 12 — Export Cards Material Upgrade

Problem

Export cards are functional but should feel more like carrying doctrine outward.

Goal

Make export cards feel like archival packets / sealed inserts.

Requirements

- Apply archival card treatment.
- Export card title should use blue or gold small caps.
- Buttons should use archival button style.
- Add subtle file-label treatment.
- Keep copy functionality.

Acceptance Criteria

- Export cards feel intentional.
 - Copy buttons work.
 - No file generation required.
 - Visual treatment matches the site.
-

19. Technical Requirements

CSS

Prefer CSS variables and reusable classes.

Avoid one-off hacks.

Create or refine:

- `.gold-foil`
- `.gold-rule`
- `.archival-card`
- `.card-seal` or `.attachment-tab`
- `.illuminated-cap`
- `.copy-button`
- `.red-line`
- `.roman-marker`
- `.hero-emblem`
- `.doctrine-bridge`

Use existing class names when possible.

HTML

Keep semantic HTML.

Use:

- `<button>` for copy actions
- `<a>` for navigation
- `aria-hidden="true"` for decorative glyphs
- useful `aria-label` where needed

JavaScript

Do not overbuild.

Only touch JS if needed for:

- copy feedback
- class toggles
- existing copy behavior cleanup

Accessibility

Maintain:

- readable contrast
- visible focus
- keyboard navigation
- mobile usability
- no horizontal overflow

Performance

Avoid heavy image filters if they slow rendering.

Prefer SVG/CSS over large raster images.

20. QA Checklist

Before finishing, verify:

Structure

- Existing Hybrid architecture unchanged.
- All sections still present.
- Chapters I–V remain intact.
- Conclusion remains final theological close.
- Sidebar links still work.
- Dropdown links still work.

Visual Materiality

- Gold reads as antique gold.
- Gold is not flat beige.
- Cards feel attached or mounted.
- Cards do not rely on normal drop shadows.
- Reader Path cards no longer disappear.
- Principles and Doctrine Map have stronger boundaries.
- Governance Gates feel judicial.
- Red Lines feel solemn and numbered.
- Person Test has English title.
- Export cards feel archival.
- Cross / wreath emblem feels stronger and more heraldic.
- Drop caps feel ceremonial.

Accessibility

- Buttons are keyboard accessible.
- Focus states visible.
- Decorative arrows hidden from screen readers.
- Copy feedback visible.
- Contrast remains readable.
- Mobile layout does not break.
- Drop caps do not damage mobile text flow.

Browser / Technical

- No console errors.
 - No broken SVGs or missing assets.
 - No layout overflow.
 - No broken copy buttons.
 - No broken anchor jumps.
 - No massive performance regression.
-

21. Definition of Done

This task is complete when:

- The site keeps its current Hybrid architecture.
 - The visual system now feels closer to the Cape Art Direction System.
 - Gold has metallic / embroidered presence.
 - Cards feel like attached paper artifacts, not generic web cards.
 - The cross / wreath emblem feels like a heraldic insignia.
 - Drop caps feel illuminated and ceremonial.
 - Buttons feel archival.
 - Red Lines feel doctrinal and judicial.
 - The Person Test title is clear.
 - Accessibility issues around decorative glyphs are handled.
 - Mobile remains clean.
 - The final page feels like a crafted ecclesial document with operational governance instruments attached.
-

22. Implementation Sequence

Follow this order:

1. Inspect files and summarize current structure.

2. Identify existing CSS tokens and component classes.
 3. Add / refine design tokens for gold, crimson, paper, blue.
 4. Implement gold material utilities.
 5. Implement archival card treatment.
 6. Apply archival treatment to Reader Paths first.
 7. Apply card treatment to Principles, Doctrine Map, Gates, and Export.
 8. Improve buttons.
 9. Improve Red Lines.
 10. Add Person Test English title.
 11. Fix decorative arrow accessibility.
 12. Update dropdown label from Executive Summary to Summa.
 13. Add bridge sentence before Principles.
 14. Upgrade cross / wreath emblem.
 15. Add or refine ceremonial drop caps.
 16. Run responsive QA.
 17. Report what changed and what files were touched.
-

23. Final Report Format

When complete, return a concise report:

```
## Completed
```

- Item 1
- Item 2
- Item 3

```
## Files Changed
```

- file path
- file path

```
## QA Performed
```

- Desktop
- Tablet
- Mobile
- Keyboard navigation
- Copy buttons
- Anchor links

```
## Notes / Tradeoffs
```

- Any issue that could not be completed

- Any asset limitation
 - Any recommendation for next pass
-

24. Important Final Instruction

Do not make the site prettier in a generic way.

Make it more materially convincing.

The goal is not decoration.

The goal is authority.

The final result should feel like doctrine printed on paper, mounted with seals, edged in antique gold, and carrying enough ceremonial weight to judge machines.
